   The system cannot locate the resource specified. Error processing resource
'decoder-config.dtd'. Line 2, Position 54

<!DOCTYPE decoder-config SYSTEM "decoder-config.dtd">

   what's the point here.

   I'm missing some information.

   Regards

   Robert

   Betreff: [loconet_info] New files for DecoderPro

   Well, it's an open source project, so here's my first contribution:

   I've added a decoder file for the Lenz LE077XF decoder (their
   smallest,
   a great "fleet" decoder for N scale) and updated the MultiPane file
   to
   display the CVs in the appropriate panes. To use these files, add the
   decoder file to the directory

    "DecoderPro0.9b3/xml/decoders",

   and _replace_ the "MultiPane.xml" in the directory

    "DecoderPro0.9b3/xml/programmers"

   with the one here. It is necessary to have _both_ files in place to
   get
   the full functioning of the decoder file.

Both files are in the DecoderPro folder in the files section:

http://groups.yahoo.com/group/loconet_hackers/files/DecoderPro/
Lenz_LE077XF.xml

http://groups.yahoo.com/group/loconet_hackers/files/DecoderPro/
MultiPane.xml

Yahoo may break those URLs - if so, get them back on one line by
copying and pasting to your URL line before using them.

Enjoy!
